SUSTONABLE
The Circular Design Surface

About Sustainable

Sustorable: the circular design surface.

Building a future where sustainability is the foundation of design.

We believe design is a choice. It's about creating a connection between the spaces we live in and the values we hold. Sustorable embraces this vision by giving aesthetics a role that lasts far beyond the surface. That's why we choose to create beauty with purpose.

Sustorable is a surface that combines elegance and durability, to meet the needs of architects and designers who demand more than just aesthetics. It inspires creative visions while minimizing environmental impact, delivering a material that redefines sustainable design.

Sustorable goes beyond fulfilling aesthetic and technical excellence. It embodies a way of living in harmony with our home, the Earth, and all its inhabitants. Because sustainability is more than a feature, it's a philosophy woven into every surface we create.

“ At Sustorable our goal is to reduce PET waste ending up in the environment while reducing the amount of raw materials used in surface production. ”

Laurens van Graafeiland
Founder

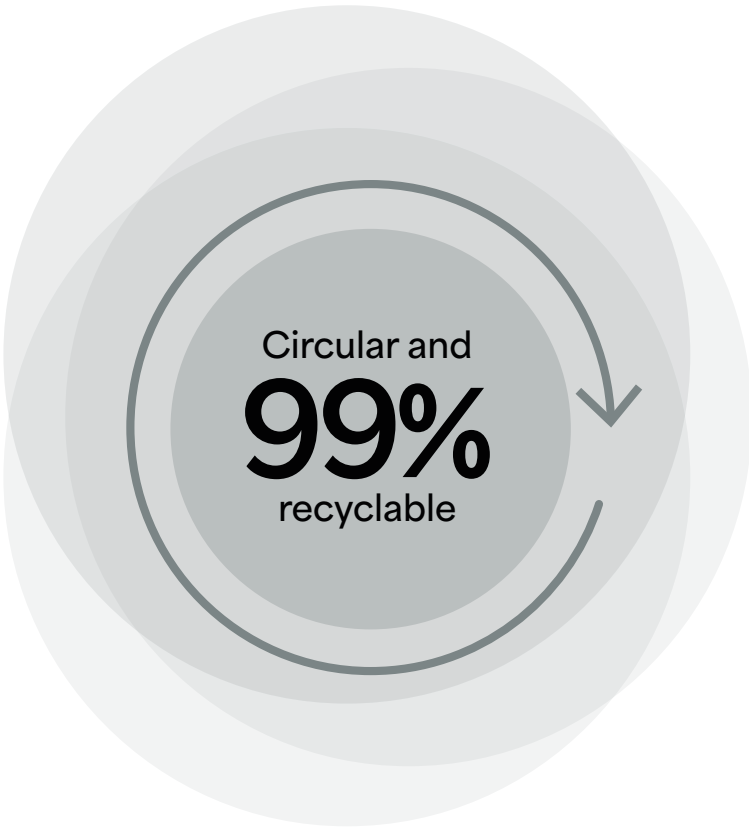

Good for you, good for the planet.

One of the most sustainable options on the planet.

Sustainable isn't just a product; it's a commitment to the environment. With sustainability at its core, it promotes a circular economy, and transforms wastes into a valuable resource.

Because the future isn't built on what we discard, but on what we choose to reinvent.

Recycled PET 2022

Recycled PET 2023

Recycled PET 2024

Recycled PET 2025

Made with natural and recycled materials

Carbon impact 70% lower than other stone materials

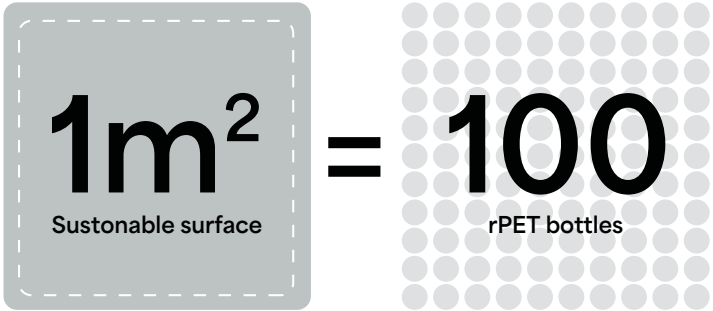

Free of hazardous chemicals, VOC or toxic additives

Recycled, recyclable, again and again.

Facts beyond words.

Sustonable is crafted using 100% post-consumer rPET, pre-consumer recycled glass, and natural stone. In an eco-friendly production process, raw materials are heated to 250-300°C, with recycled PET serving as the binding agent to create a durable surface.

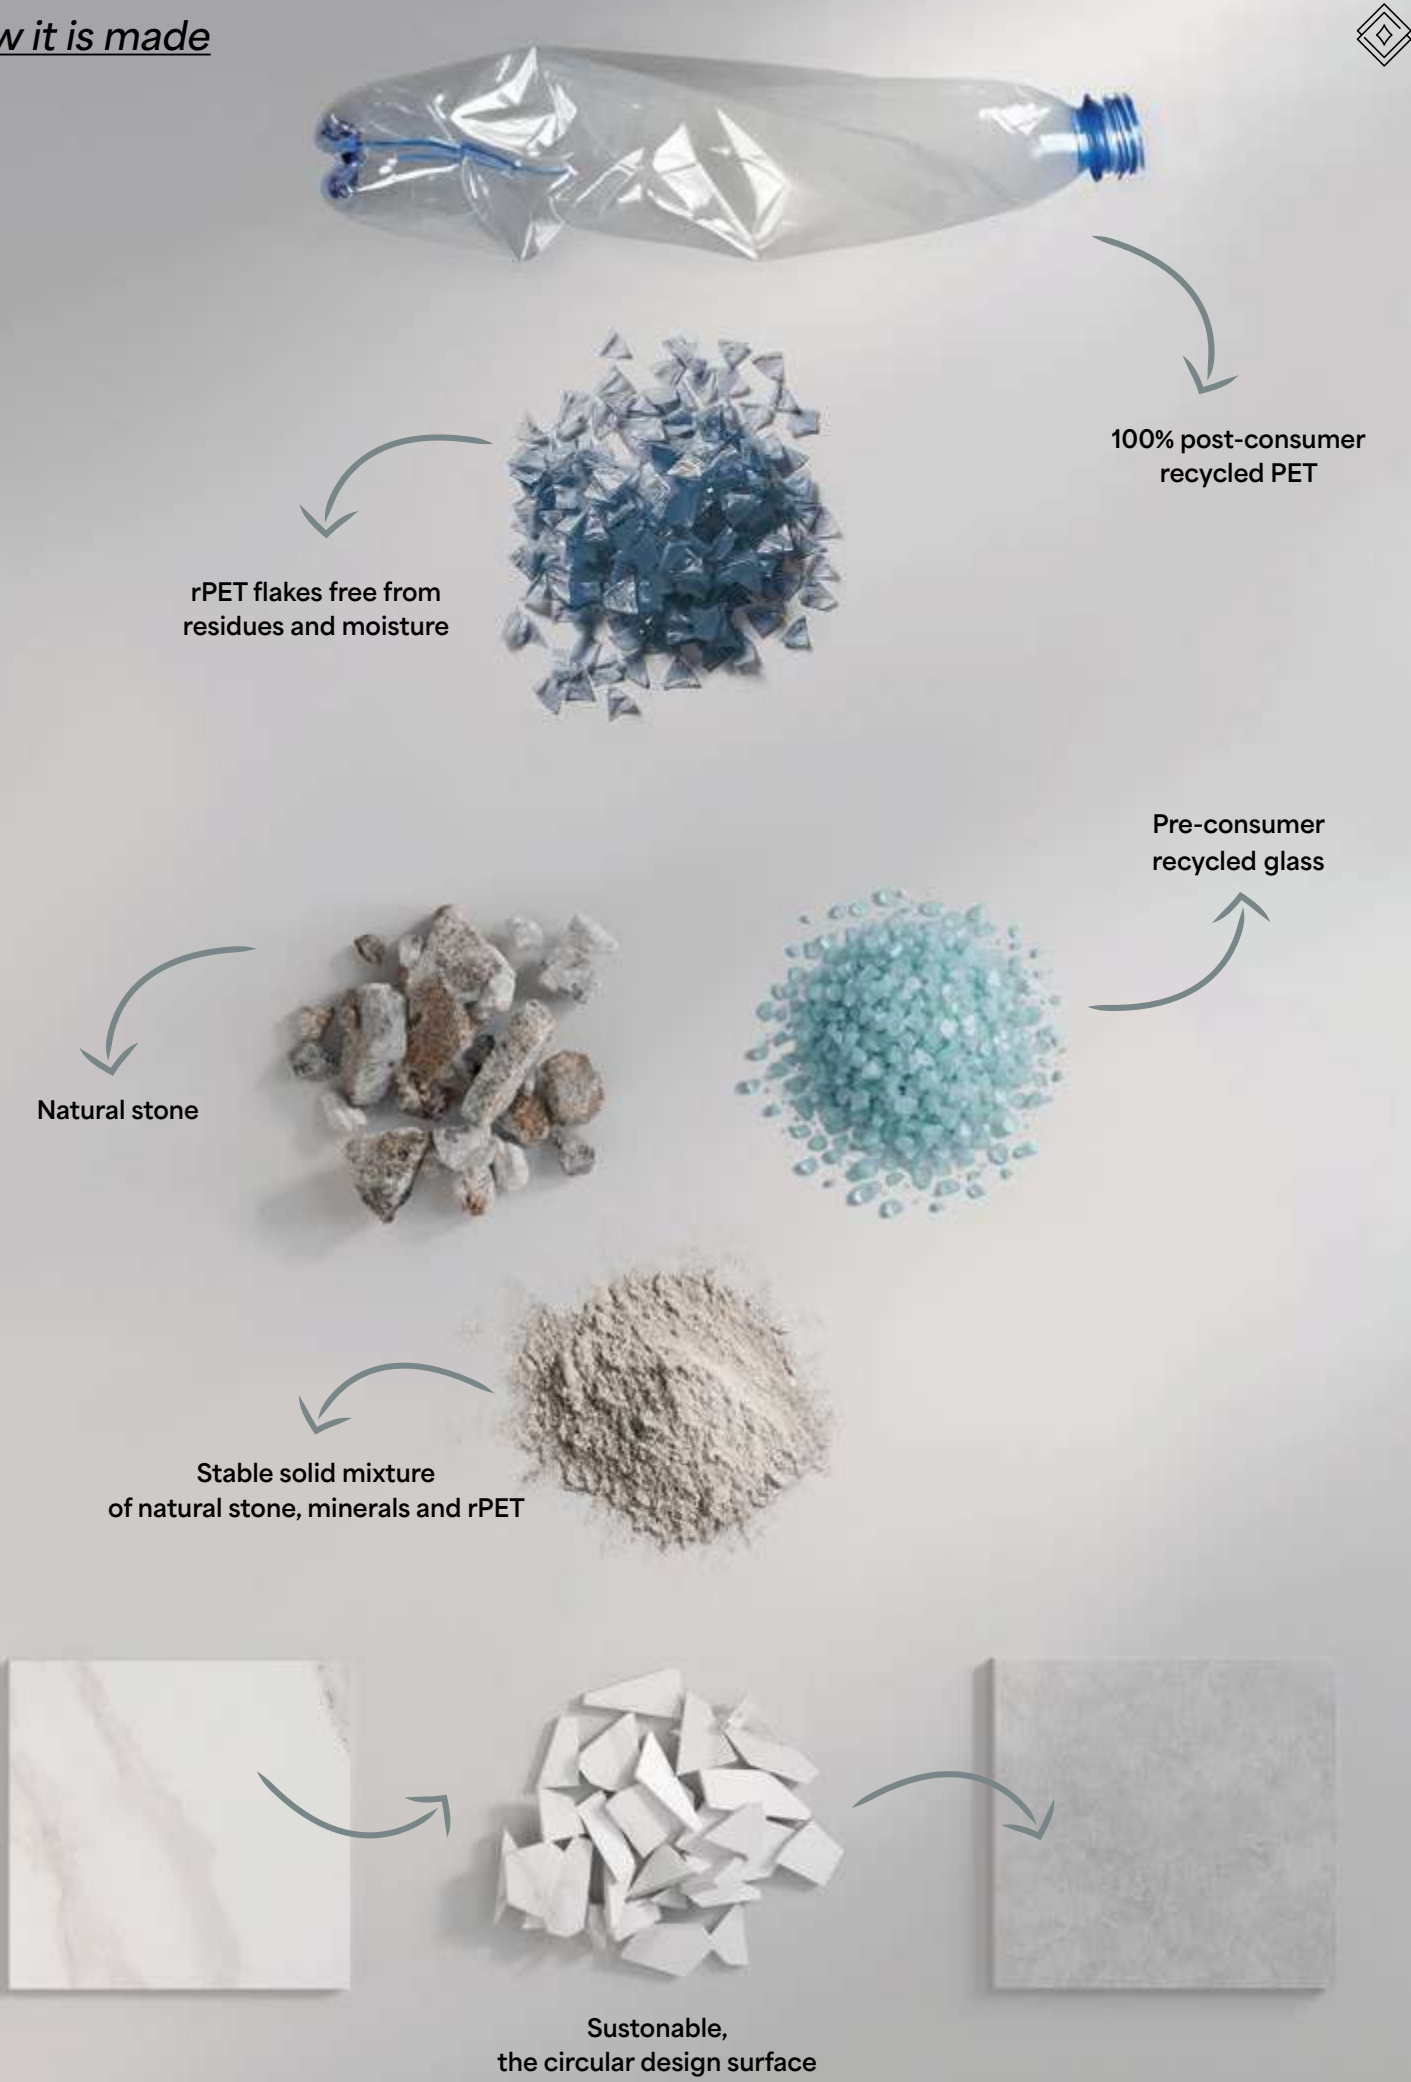

This production method is meticulously designed to minimize emissions, eliminate toxic catalysts, and ensure a safe working environment.

The art of recycling: clean, clear, consistent.

The post-consumer rPET used in Sustonable surfaces is sourced from recycling facilities near our factory in Polatlı, Ankara. Only clear and blue plastic bottles are selected to ensure consistent color tones. These bottles are carefully sorted to remove impurities, shredded into flakes, thoroughly washed to eliminate residues, and dried to remove all moisture.

How it is made

Alluring, elegant, contemporary.

Various sizes

Wide range
of looks

Thin, lightweight
and easy to install

Customizable
in size and design

In just a word: Sustorable.

Sustorable offers a range of stunning surfaces in different inspirational looks, designed to elevate interiors.

It combines refined, contemporary aesthetics with functionality and ease of installation, making it the perfect choice for green building projects and creative solutions.

Versatile indoor
applications

Material for
green building

High impact resistant

Reduces the risk of cracks or breaks during installation, ensuring exceptional durability even under stress.

Stain resistant

The non-porous surface effectively resists stains, keeping a pristine look intact over time.

Waterproof

Ideal for areas with frequent exposure to water, offering unmatched protection.

Hygienic & Easy to maintain

The non-porous design prevents stains and enables quick, effortless cleaning, ensuring a hygienic surface.

Sustainability leader

Boasts a 70% lower carbon footprint compared to traditional stone materials, is 99% recyclable, and produced without VOC emissions.

Lightweight & durable

Thin slabs use 70% fewer raw materials than engineered stone, making them easier to transport, handle, and install without compromising strength or quality.

Aesthetic powered by functionality.

When innovation meets performance.

Combining cutting-edge technology with sustainability, Sustorable redefines what's possible in contemporary design. Each feature is crafted to meet the demands of contemporary interiors with style and efficiency.

Different looks for unique design.

Boost your creativity.

For interior cladding, Sustorable replicates the finest materials of inspiration—marble, concrete, stone, wood, terrazzo, and solid colors—while delivering superior performance. It combines exceptional durability, versatile installation options, and a commitment to environmental sustainability.

The Sustonable solution.

A versatile choice.

Sustonable surfaces come in three large formats, available in 6 mm and 8 mm thicknesses, both in two finishes: the elegant Matte for a contemporary effect and the refined Semi-Gloss for a subtle shine. Lengths can be customized to suit specific project needs, ensuring a perfect fit for any space.

6 mm / 1/4" THICKNESS

S73: WEIGHT 12.42 kg/m² / 2.54 lbs/sqft

8 mm / 5/16" THICKNESS

S73: WEIGHT 16.56 kg/m² / 3.39 lbs/sqft

Sustonable is much lighter yet more durable than other materials:

Sustonable	S73: 2.071 kg/m³ / 129 lbs/ft³
Marble / Granite	2.700 kg/m³ / 169 lbs/ft³
Porcelain	2.400 kg/m³ / 150 lbs/ft³
Quartz engineered stone	2.300 kg/m³ / 144 lbs/ft³

Commercial and residential wall coverings

Residential floors

Kitchen worktops

Retail displays

Sinks & Vanity tops

Marine interiors

Endless application possibilities.

Bathrooms

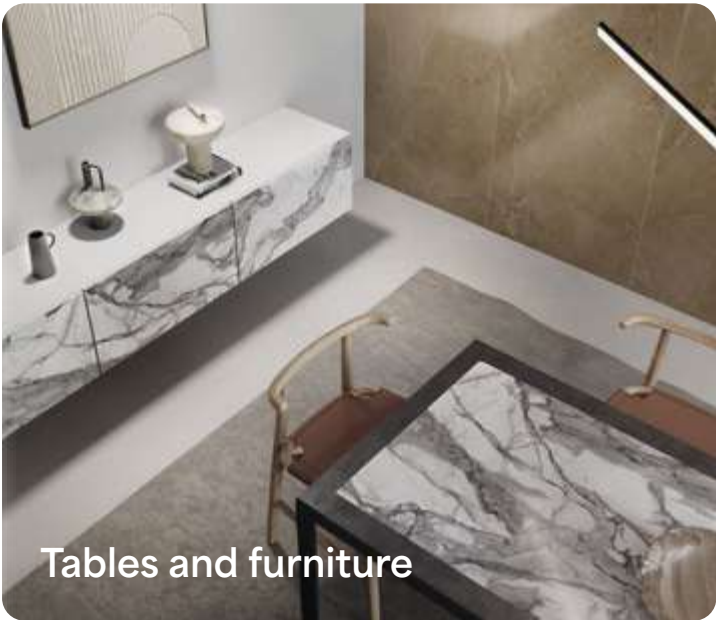

Multi-functional surfaces for today's interiors.

Sustorable is the ideal choice for multiple interior design applications, adapting to both residential and commercial projects.

Perfect for wall coverings, tables and furniture, as well as sophisticated retail display, Sustorable combines form and function, offering architects and designers a sustainable material that fits any vision.

Mix it up. Make it yours.

The versatility of Sustorable lies in its ability to combine the various looks of the range. Each finish is carefully designed to complement the others, allowing for endless mix-and-match possibilities, with different shades or textures.

Sinks & Vanity tops

Sustenable completes its offering with sinks with vanity tops designed for bathroom design: a countertop-mounted sink and a wall-mounted sink with an accessible basin. Both options are available in any color and finish from the Sustenable range, ensuring a seamless match with other applications.

Axonometric

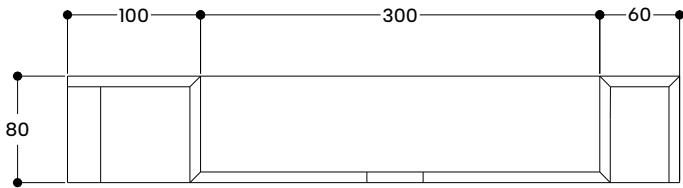

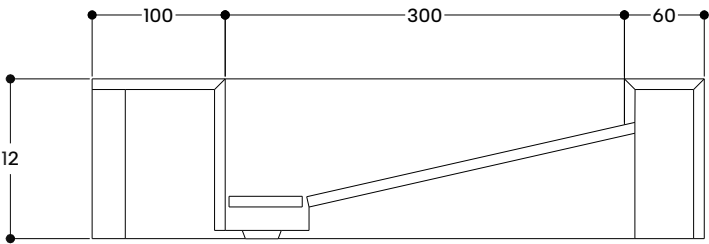

A 30x100 cm / 12"x39"
B 46x200 cm / 18"x79"

Certifications

Recycled Claim Standard (RCS)

Certifies the use of recycled materials in our product manufacturing, supporting a more circular economy.

NSF International

Guarantees that our products meet safety standards, and ensures they are suitable for public health applications.

Environmental Product Declaration (EPD)

Highlights a commitment to ecological responsibility and transparency, providing a clear, objective assessment of the environmental impact of our surfaces across their entire lifecycle.

ISO 9001

Certifies our focus on delivering high-quality products and processes, ensuring customer satisfaction through excellence and continuous improvement.

ISO 14001

Reflects our commitment to reduce environmental footprint by following global best practices in environmental management and improving sustainability efforts.

ISO 45001

Showcases our proactive commitment to worker health and safety by minimizing risks and driving continuous improvement throughout every stage of operations, from design to sales.

USGBC Member

Certifies a commitment to sustainable building practices and environmental responsibility, promoting healthier and more efficient structures.

Recycled Content Certification (RCC)

Measures the percentage of recycled content from pre- and post-consumer materials diverted from waste, ensuring verifiable sustainability claims.

REACH

Verifies that the substances used in our products comply with the European Union's REACH regulation, meeting rigorous chemical safety standards to protect both human health and the environment.

GREENGUARD GOLD

Ensures that our products comply with rigorous chemical and VOC emission standards, promoting healthier indoor environments.
